Manufacturers Represented January, 2021

For technical sales and support, please contact us at 972 414-8188

Microwave Amplifiers: LNAs, SSPAs, frequency converters, multipliers, GaN amplifiers, amplifier subsystems. www.cttinc.com

RF / Microwave Rotary Joints: precision microwave rotary couplers for use in radar and satellite communication antennas. www.diamondantenna.com

Coax Connectors, Cables and Cable Assemblies to 70GHz. High quality design and manufacturing of RF and Microwave interconnect solutions. www.dynawave.com

GPS Time and Frequency Systems: precise time and frequency references, security/public safety, wireless communications, military time and frequency, network timing, custom solutions. www.zyfer.com

Antennas and Antenna Subsystems with particular focus on Multiband ISR Arrays: products include Hybrid Spirals, Airborne Blades, Broadband Cards, Flat Panel Arrays, and Custom / Special products www.JemEngineering.com

Precision Frequency Control and Spectrum Control Solutions: Crystals, VCXO, TCXO, OCXO; Filters, Diplexers, Multiplexers, Switch Filters. www.mtronpti.com

Industry Leading Manufacturer of Ceramic Capacitors: single and multilayer ceramic chip capacitors, high reliability extended range, radial leaded, stacked, high voltage, rf/microwave/optical, products for downhole, mil/aero and space applications. www.presidiocomponents.com

Integrated Microwave and Millimeter wave Assemblies, Frequency Sources, Ferrite Assemblies, including control products, oscillators, frequency converters, isolators and circulators, exciters, multipliers, etc... Antennas (airborne, missiles, space, GPS, Satcom, frequencies of 20MHz to 40GHz) www.tecom-ind.com www.trak.com www.millitech.com

Electromechanical and Solid State Relays, Coax Switches and Switch Matrices: rf, microwave, wireless, high speed digital, instrumentation, semiconductor test, motor control, commercial aviation, military and space. www.teledynereleys.com

Passive Microwave Components: power dividers, couplers, hybrids, baluns, custom assemblies; includes Putnam RF Components high power devices. www.trmmicrowave.com

Programmable signal switching and distribution products for use in the defense, communications, telemetry, ATE and broadcast industries: the latest in solid-state, digital, relay and fiber optic technologies are leveraged for optimum and cost effective results. www.uswi.com
