

# Slip Ring and Rotary Union Solutions: *MITSUBISHI*

## Moog and GAT Solutions

Moog and GAT have established a modular system for developing and manufacturing its slip rings and rotary unions. System building blocks can be matched to meet each customer's specifications to provide field-proven, cost effective solutions. It is this modular core construction along with a vast range of custom features that provide the ultimate system solution.

### Slip Ring Features:

- High Reliability, long life slip rings
- Low maintenance slip rings utilizing advanced materials
- Flexible design with modular slip ring configuration
- Field proven designs
- Complete solutions for wind applications integrating position feedback, fiber optics, fluid, and electronics

### Available Mitsubishi Units

1 MW Platform	Rotary Union, Slip Ring, Rotokombi
2.4 MW Platform	Rotary Union, Slip Ring, Rotokombi
2.4/2.5 MW 102A turbine	Rotary Union, Slip Ring, Rotokombi

### Rotary Union Features:

- Hydrostatically regulated radial gap seal
- Pressures up to 600 bar
- Speeds up to 20,000 rpm
- Wear-free ceramic coating
- For flow rates up to 300 l/min
- Low mechanical loss
